## An Orange House Mini Guide

By Rich Mayfield  
Versions 1 Feb 2015

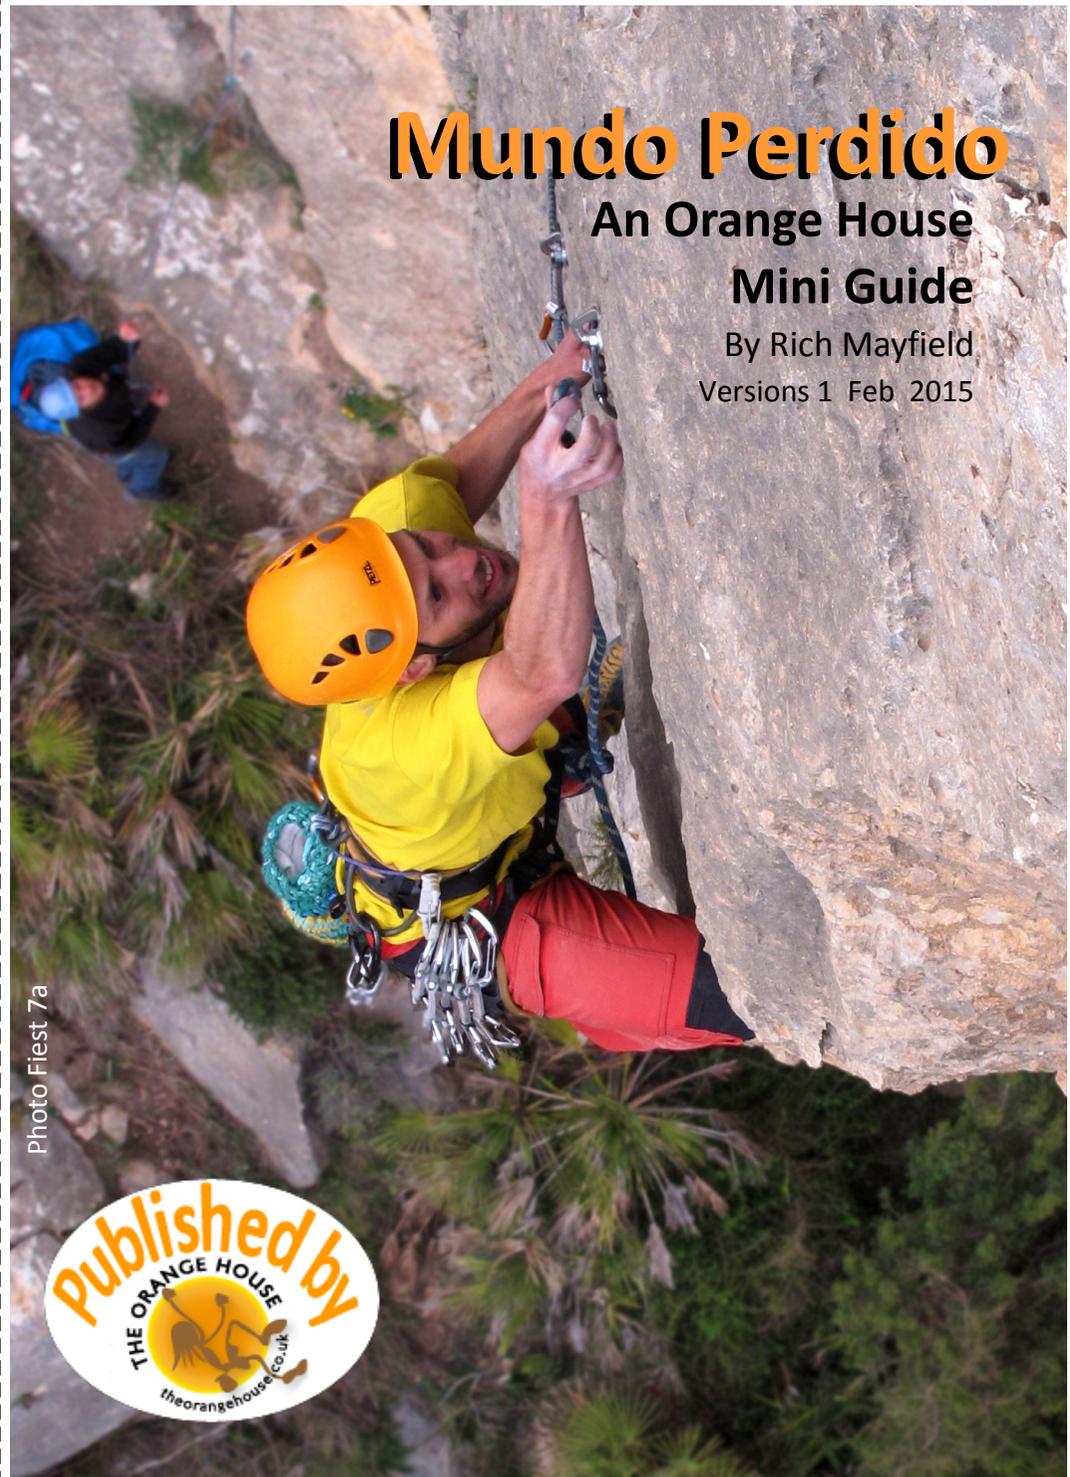

Photo Fiest 7a

How to assemble this mini guide.  
 Print single sided  
 Fold all pages in half along dotted line,  
 then place internal pages  
 inside cover. Staple together at the spine.

**Approach by car 15 minutes from Sella**

There are two driving approaches, the first is easier on the car but has a further 1km of walking, the second should only be attempted by a 4x4 or hire car with complete insurance. Drive through Sella on the CV 770. From the last Sella sign drive for 4.5 km to a sharp left with a smaller road going straight on.

First approach, take this small windy road for a further 6.6km all up hill. Either park where the tarmac finishes or walk/drive up the sharp rightwards dirt track for 1.2km. Park just off the track. Then walk along the very rough road for 650m to a turning circle, with two metal posts.

Second approach, take this small windy road for a further 5.5km all up hill and a hair pin left, where a dirt road leads straight on take this for 2.3km, as the trees clear, a sharp left brings you back into the trees and back along the top of the ridge to a turning circle with two metal posts.

Six minute walk into the top of the Via Ferrata.

From the parking head south-west along the dirt road for 150m. A path leads left just before the trees, follow this for 50m, then cut through the trees and walk along the edge of the trees (on your right) for 100m until a well defined paths leads down hill to the top of the access Via Ferrata.

A few metres to the left (looking out) of the base of the Via Ferrata.

**1 The Crow Eaters 28m f6c/6c+**

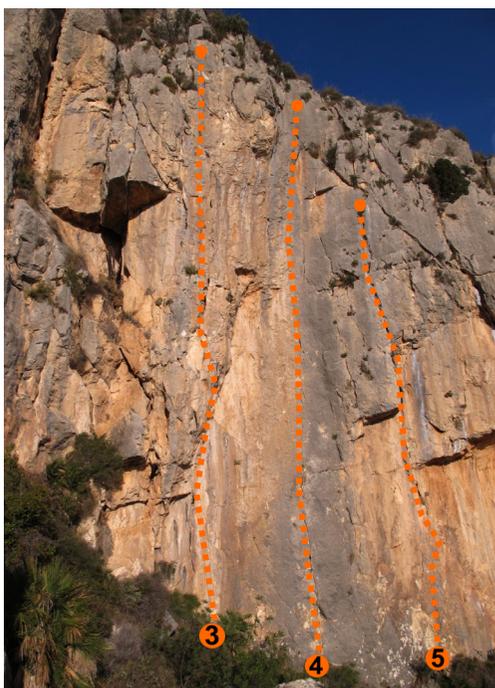

The steep open groove and the face above. The groove is very absorbing, and provides a brilliant and unusual crux. FA M Robertson R Mayfield May 2014

**2 The Bauble Chain 28m f 6 c**

The awkward starting V-groove is followed by a long and beautiful arête. Expect the technical crux to arrive on the upper half. M Robertson R Mayfield May 2014

**3 La Casa de los Vampiros 30m 7a**

Climb the wall to the steep corner, make powerful moves. Sustain climbing on fragile rock, a great line which just needs a little more traffic. FA Laslo Pre Dec 2011

Walk down hill for 20m for these routes.

**4 Happy Birthday! 28m f6b+**

The long, discontinuous crack in the faint groove. Superbly sustained. M Robertson N Andrews R Mayfield Dec 2011

**5 Mi Hija 20m 6b**

Climb the tufa cover rock to the first overlap then make exposed moves at the second overlap, finishing up an easy crack.

FA Rich Mayfield & Trish Cooke Mar 2015

Feist is the obvious hanging arête, it is a long route and lowering off you end up being much lower than the start, so use at least a 70m rope.

**6 Feist 35m f7a**

14 bolts. An average start up a slab and a V-groove brings you to a massive traverse across the hanging grey face. Tackle the sustained left side of the arête to the very top. Amazing positions!

Rich Mayfield M Robertson Oct 2014

Follow a faint path down hill for 100m.

**8 Je Suis Charlie 75m 7a+/7b**

1 28m. 7a+/b Climb the wide crack which is harder than it looks to where it steepens. Make long powerful pulls to a lower off or belay.

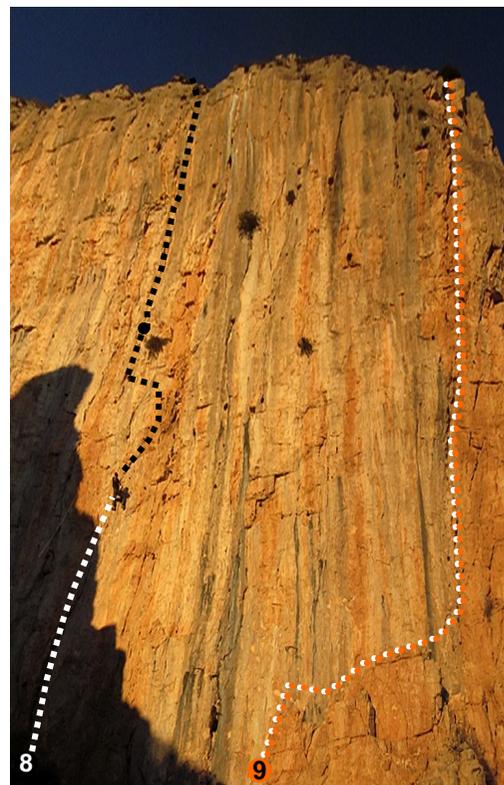

2 45m. 6c+ Climb the discontinuous cracks up the "never ending wall" Steep and mostly on good holds. 16 bolts.

FA R Mayfield & A Gomez

**9 Caras Lindas 75m 6a 6a+**

A stunning traditional crack line which is climbed in two pitches, large cams and wires. Be careful of loose rock.

FA Nacho Sanchez & Gelga 20 Jan 2008

**10 No esperaba que 20m 4**

Climb the easy angled arête to where it steepens.

FA R Mayfield & Corina Gafner

**11 Chiquitito 25m 7c?**

Climb the interesting slab to a rest. Then quest through the steeper ground on impossibly tiny holds to a technical and open corner and easier ground.

FA R Mayfield Mar 2015 not seconded

**12 Willets' crack 12m 6a+**

Opposite the above routes on the fin of rock is a short pitch which is much harder than it looks.

FA R Mayfield & C Willet

**13 Fiesta de Sella 50m 6c**

Follow a faint path down the gully to the edge of the fin of rock

1 6c Climb the right hand side of the first fin to a tricky move to gain the arête.

2 4 Climb, crawl or ride the fin back to the ground!

FA R Mayfield & M Roberts

**14 KP Arête 28m 6b**

The opposite arête is climbed via steep moves then to looong reaches.

FA R Mayfield & K Palmer

**Slack lining**

Five bolts on each side of the two fins have been placed for the purpose of high lining. If you're brave enough! You will have to bring your own hangers.

The gap is just over 10m so shouldn't be too hard to walk it. Just don't look down!
